

Dear Hiring Manager,

When learning about the job opening for the Support Intake Technician position at your company, I was immediately compelled to apply. My industrial technology bachelor's and my professional experience in dealing with technology in almost all of its facets will be useful to perform the role needed to be filled in.

I have always been amazed by how fast technology progresses. As a technician, I keep updated to catch up with the latest technology improvements, whether hardware or software updates. Aside from the roles I had in other companies, my family-owned business was the biggest factor in my exposure to the world of technology. I am very familiar with standard procedures in troubleshooting to solve different technical issues, and I am confident that my skills and knowledge are helpful and reliable for the available role.

Working with a team is my strongest suit. I'm a team player and I observe the highest standard of work ethics, both in an online space and an office workplace. The opportunity to work for Agilysys, Inc. will be the biggest I'll have, a life-changing one. I'm available for an interview anytime. Please let me know your thoughts about my application.

Thank you so much!

Sincerely,
Roseller Enriquez Jr.
